<ul style="list-style-type: none"><li>• Acquired expertise in Shell Scripting, Logical Programming, and Java OOP; developed programs like Employee Wages and Mood Analyser, and backend APIs for Employee Payroll, User Registration, AddressBook, Insurance Registration, and BookStore using Spring Boot.</li></ul>	

- Designed frontend interfaces with Angular; extensively utilized RESTful services and Spring Core during fellowship program.

## Frontend Web Developer

Peak Web Guide

Feb 2019 - March 2020

Nagpur, India

- Developed and maintained WordPress websites, ensuring UI best practices.
- Developed responsive web templates using HTML, CSS, and modern JavaScript libraries.
- Designed and implemented HTML email templates and newsletters for marketing campaigns, ensuring cross-client compatibility and adherence to email best practices. and implemented HTML email templates and newsletters for marketing campaigns, ensuring cross-client compatibility and adherence to email best practices.

## PROJECTS

---

### Roles/Contributions :

Requirement gathering, Development, Troubleshooting, Testing

### Environment :

React.js, Next.js, TypeScript, JavaScript, Git, HTML/CSS, UIKIT/UILINE Library, JEST

### Clinician Project (UI Developer)

Developed and integrated Add/Edit/View pages for the Clinician project, ensuring comprehensive functionality. Successfully deployed the Clinician project to production, enabling live usage of the implemented features Using React.js, Next.js technology with micro service.

### Manage Clinician (MFE) (UI Developer)

Developed Manage Clinician MFE as the core module, with all other functionalities as components arranged in a parent-child relationship. Implemented Add Clinician, Edit/View Clinician, Delete Clinician, Download Clinician, and Upload Clinician components within the Manage Clinician MFE. Enabled the Manage Clinicians link to appear on the My-Account Page, contingent upon user privileges. Configured the Manage Clinicians link to open the Manage Clinicians MFE upon click, presenting a list of clinicians associated with the SoldTo account of the logged-in user. Incorporated a search feature allowing users to input search text, such as clinician first name or last name, for efficient clinician identification within the Manage Clinicians MFE

### Patient Management (UI Developer)

Created and Integrated Add Patient, Edit Patient, View Patient, and Search Payer pages into the Patient main landing page of Patient Management project, enabling comprehensive patient data management. Developed seamless user interactions for adding, editing, and viewing patient details, ensuring efficient integration with the system

### Website which I have Made in Peak web Guide Company :
